Juergen

Thank you for the labeler set-up you have provided us.

The 2 labelers you replaced in June on the glass line and on the gallon line are an amazing upgrade to what we had there before. Great machines those ALS applicators.

But what I really love is the box labeler you built for our tight space.

As the box comes out of the case former, your ALS204 applicator is wiping on our product barcode label as the box travels on this 3' short box conveyor. Then the box shelf catches the box, triggering the remote demand sensor of the case former.

I can't believe that you were able to work with this tight space you had available.

The quality machines you provided and the attention to detail are second to none.

Thank you so much Juergen. I would be happy to give anyone a reference about the machines but most important the service you supply.

Henry Lam
